COLLECT_{AN}DRAIN[®]

Model 5680A

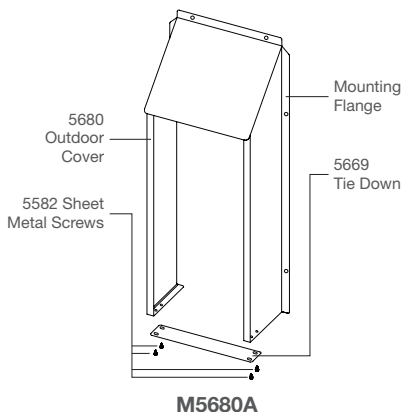

Installation Instructions

Inspection:

Unpack the Model 5680A Outdoor Cover Assembly and carefully inspect it for any damage caused during shipping.

Verify box contents, each M5680A includes:

- 5680: Outdoor Cover
- 5669: Tie Down
- 5582: Four (4) Stainless Steel Sheet Metal Screws
- 5583: 45° Elbow

Installation:

The COLLECT_{AN}DRAIN™ M5680A Outdoor Cover Assembly will be installed directly over the M5450/M5500 Outdoor Model. It attaches to the wall or other secure structure using the Mounting Flange holes provided (3/8"). AGF recommends using mounting fasteners (not provided) suitable for the surface to which it is being mounted.

1. Install the COLLECT_{AN}DRAIN™ M5450/M5500 in the desired location according to the Owner's Manual instructions. Make sure all plumbing and electrical work has been completed within the available space shown in the diagram. To ease plumbing, the M5680A Outdoor Cover Assembly includes a 45° inlet elbow.
2. Slide the COLLECT_{AN}DRAIN™ M5680A Outdoor Cover down over the M5450/M5500. The internal tabs of the M5680A should rest on top of the M5450/M5500 and both sides of the M5680A should be slightly below the bottom of the M5450/M5500. If not, investigate why and correct the issue before proceeding to the next step.

3. Push the COLLECT_{AND}DRAIN™ M5680A Outdoor Cover flush against the mounting surface and, using a clamp or helper, squeeze the bottom sides of the M5680A so they are tight against the M5450/M5500. Then, mark all six (6) hole locations in the Mounting Flange on the mounting surface.
4. Remove the clamp (if used). Then, lift the M5680A Outdoor Cover off of the M5450/M5500 and drill all six (6) hole locations into the mounting surface according to the fastener's requirements.
5. Run a bead of caulk or sealant around the back side of the Mounting Flange; this will prevent rain and snow from getting behind the unit. Then, carefully slide the M5680A Outdoor Cover down over the M5450/M5500. Make sure there is a gap between the Mounting Flange and the wall to ensure the caulk or sealant does not smear down the wall.
6. When the M5680A Outdoor Cover comes to rest on top of the M5450/M5500 push the M5680A against the wall and use a clamp or a helper to squeeze the bottom sides of the M5680A so they are tight to the M5450/M5500 like in Step 3.
7. Install the 5669 Tie-Down to the bottom of the M5680A Outdoor Cover using the four (4) 5582 Sheet Metal Screws (5/16" Hex) as shown in the diagram. Tighten to a maximum torque of 50 in lbs. Then, remove the clamp (if used).
8. Install the six (6) wall mounting fasteners (not provided).
